Model 120 is a modern high capacity truck scale and silo load cell of low profile. Complete with its own unique rocker mounting.

Suitable for all heavy duty weighing applications the 120 gives the user high accuracy and low installation cost.

The 120 has a stainless steel housing to protect against corrosion. The alloy steel parts are nickel plated.

Two additional sense wires feed back the voltage reaching the load cell. Complete compensation of change in lead resistance due to temperature change and/or cable extension, is achieved by feeding this voltage into the appropriate electronics.
